

District Secretary guide

You set up your GNAT district, add your Local Secretaries and send each one their access code.

Website: gnatashanti.rootabytes.com

1 Get in

Register from the link the Regional Secretary shares, using the registration key in the same message. Your district code then appears on screen: tap Send to my WhatsApp to keep a copy. If you were sent a code instead, just open its link.

2 Add your details

Step 1, Secretary: your name and phone number, so the Regional Secretary can reach you. Tap Save & continue. To correct them or the district name later, tap Edit details at the top.

3 Choose political districts

Step 2: tick the political administrative district(s) your GNAT district covers. Type in the search box to find them quickly.

4 Add your Local Secretaries

Tap Add Local Secretary (at the top of every step). Enter the local's name and its secretary's name and phone number, then tap Add Local Secretary. Their code appears straight away: tap WhatsApp or SMS to send it from your own phone.

5 Remove a Local Secretary

Tap Remove secretary on a local: their code stops working at once and the workplaces already listed are kept. Then tap Add secretary for the new one.

6 Follow up

Each local shows In progress, Submitted, Returned or Approved. If a Local Secretary cannot do it, tap Fill workplaces and list them on their behalf.

7 Review and submit

Step 4, Review & submit: check everything and tap Submit district. Locals that have not finished can still submit after you.

8 If it comes back

A returned district shows the Regional Secretary's note. Correct it and submit again. Once approved it can no longer be changed.

Good to know

- Code sent to the wrong person? Open Share code on that local and tap Make new code, then send the new one.
- Everything is saved as you go. Stop and continue later on any phone.
- The system never sends messages or uses your credit by itself. Your normal SMS rate applies to SMS you send.
