

District Chairman guide

You set up your GNAT district, add its locals, and send each Local Chairman their access code.

Website: gnatashanti.rootabytes.com

1

Get in

Register from the link the Regional Secretary shares, using the registration key in the same message. Your district code then appears on screen: tap Send to my WhatsApp to keep a copy. If you were sent a code instead, just open its link.

2

Add your details

Step 1, Chairman: your name and phone number, so the Regional Secretary can reach you. Tap Save & continue.

3

Choose political districts

Step 2: tick the political administrative district(s) your GNAT district covers. Type in the search box to find them quickly.

4

Add your locals

Step 3, Locals: add each GNAT local with its Local Chairman's name and phone number, then tap Add local. Each local gets its own access code.

5

Send each code

Tap Share code on a local to send its code by WhatsApp or SMS from your own phone, or copy it. The message is written for you: just tap send.

6

Follow up

Each local shows In progress, Submitted, Returned or Approved. If a Local Chairman cannot do it, tap Fill workplaces and list them on their behalf.

7

Review and submit

Step 4, Review & submit: check everything and tap Submit district. Locals that have not finished can still submit after you.

8

If it comes back

A returned district shows the Regional Secretary's note. Correct it and submit again. Once approved it can no longer be changed.

Good to know

- Code shared with the wrong person? Open Share code on that local and tap Make new code: the old one stops working at once. Then send the new one.
- Everything is saved as you go. Stop and continue later on any phone.
- The system never sends messages or uses your credit by itself. Your normal SMS rate applies to SMS you send.
