

Regional Secretary guide

You run the mapping for your region: add the District Secretaries, follow progress, review submissions and download the results.

Website: gnatashanti.rootabytes.com/admin

1 Sign in

Go to gnatashanti.rootabytes.com/admin and sign in with your email or phone number. The first time, add your email and choose your own password.

2 Add District Secretaries

Tap Add District Secretary (top of the menu, and on Overview). Enter the GNAT district and the secretary's name and WhatsApp number, then send them the code that appears. Or tap Share sign-up link to post the registration link and key in their WhatsApp group.

3 Remove a District Secretary

On Districts, tap Remove secretary. Their code stops working at once. The district's locals and workplaces are kept; tap Add secretary to add the new one. A district with nothing filled in yet is removed completely.

4 Follow progress

Overview shows live totals and the political districts not yet covered. Districts lists every district and its status. Tap Remind to send a WhatsApp or SMS reminder.

5 Review submissions

Open a submitted district to check its locals and workplaces. Tap Approve district, or Return for correction with a short note the District Secretary will see.

6 Access codes

Access codes lists every code. Send one by WhatsApp or SMS, read it out on a call, or Print code slips for a meeting. Reset a code if the wrong person has it.

7 Download the results

Downloads gives Excel, CSV and a PDF report, always built from the latest data.

8 Structure and Activity

Structure shows districts, locals and workplaces as a tree. Activity shows who changed what, and when.

Good to know

- Every Send button opens your own WhatsApp or SMS with the message ready. The system has no messaging provider.
- Downloads contain names and phone numbers. Keep them within GNAT.
- Forgot your password? Ask the super admin for a new temporary one.
