

You list every school and workplace where members of your GNAT local work.

Website: gnateastern.rootabytes.com

1

Open your link

Your District Secretary sends you a link and an access code by WhatsApp or SMS. Tap the link, or go to gnateastern.rootabytes.com and type the code. Keep the code private: anyone who has it can change your local.

2

Add your details

Step 1, Secretary: enter your name and phone number, then tap Save & continue.

3

List the workplaces

Step 2, Workplaces: type each school, office or institution, choose its category and tap Add. The GPS address (for example AK-039-5028) is optional.

4

Long list? Use Excel

Tap Excel template, fill it in on your phone or a computer, then tap Import from Excel. Check the preview before you add them.

5

Review and submit

Step 3, Review & submit: check the list, then tap Submit local. It is then locked while the Regional Secretary reviews it.

6

If it comes back

If your local is returned, the Regional Secretary's note appears in red. Make the corrections and submit again.

Good to know

- Your work is saved as you go. If the network drops, it stays on your phone until you are back online.
- Come back any time with the same link or code, on any phone.
- Lost your code? Ask your District Secretary or the Regional Secretary to send it again.
- List each workplace once, with its correct category.
